## ATS Controller (ATSC25)

| Technical data                       |  |
|--------------------------------------|--|
| Specifications:                      | ATSC25   |
| Supplied from measurement circuit    | 184 - 300 VAC                                  |
| Power consumption                    | 10 W   |
| Measurement range                    | linear   |
|                                      | phase  |
| Frequency                            | 45 - 65 Hz                                     |
| Emergency input (fire) voltage, V DC | 12 - 24 VDC                                    |
| Communication interface              | RS485  |
| Conductor cross section              | 0,5 - 2,5 mm <sup>2</sup> (screw terminals)    |
| Mounting                             | DIN rail / door                                |
| IP rating                            | IP 20 (IP40 for front mounting)                |
| Operation temperature                | -25 °C ... +60 °C                              |
| Operation humidity                   | 80 % / 50 °C<br>95 % / 40 °C                   |
| Dimensions (H × W × D)               | 96 x 144 x 106                                 |
| Measurement category                 | III  |
| Standards                            | IEC 61010-2-201, IEC 60947-6-1,<br>IEC 60947-1 |

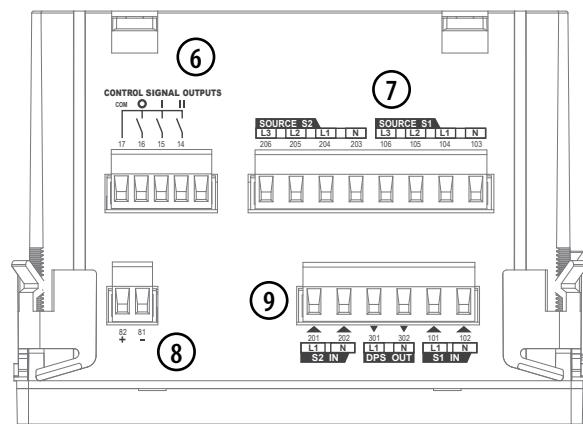

## Description

Connectors top view

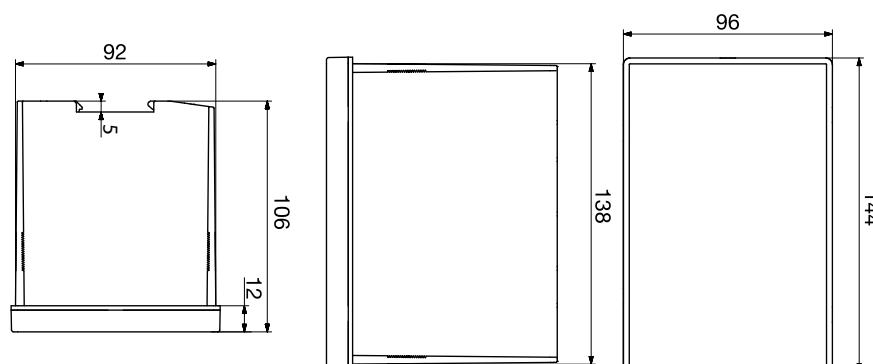

1. RTSE position feedback input
2. 24 V.d.c fire input
3. Enable control when closed / disable control when open
4. RS485 connections
5. Genset Start relay

Connectors bottom view

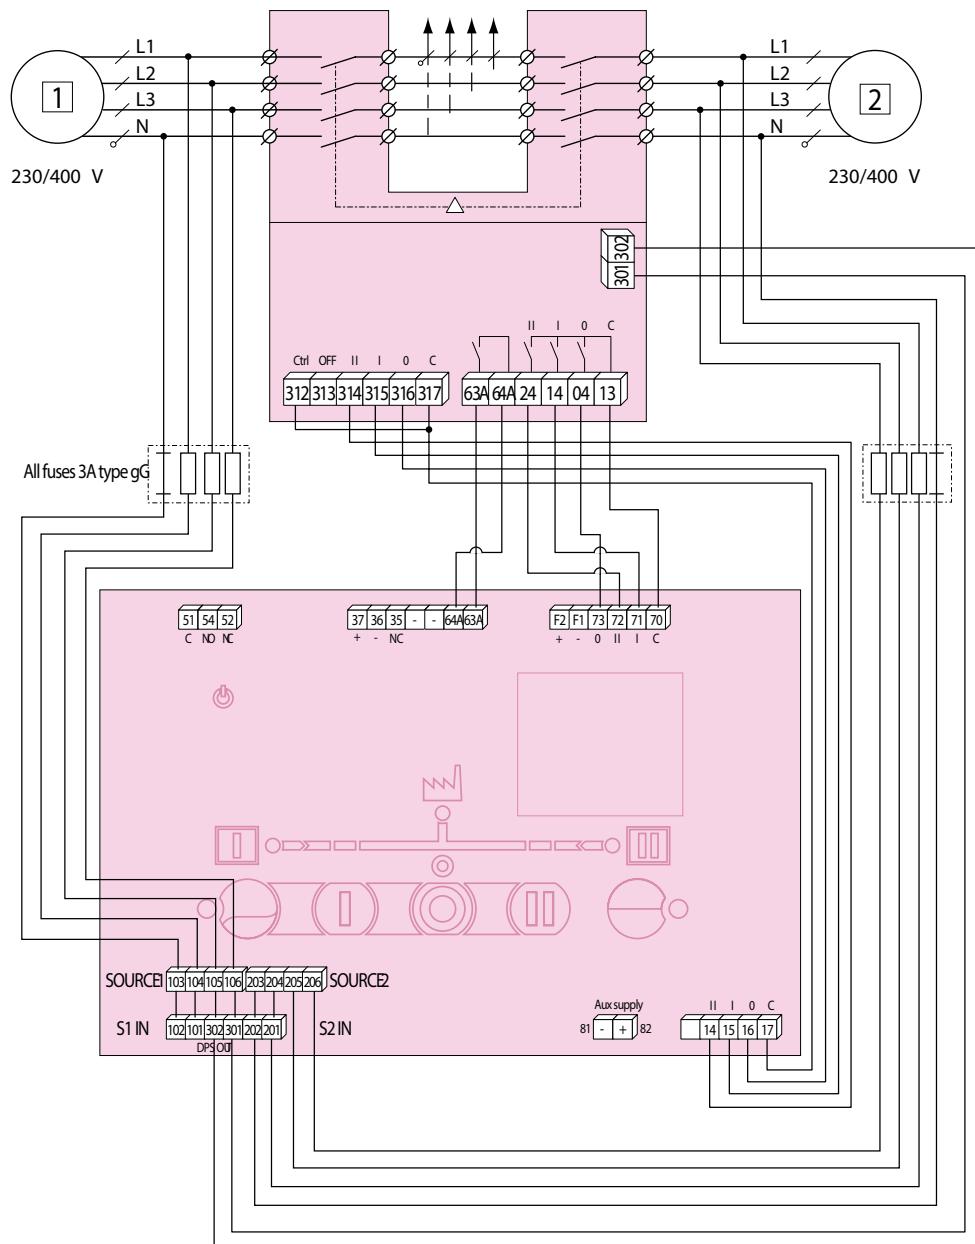

6. RTSE position control outputs
7. Source 1 and 2 voltage inputs
8. 24 V.d.c Aux supply
9. External DPS – Input / output

## Dimensions

## Wiring Diagrams

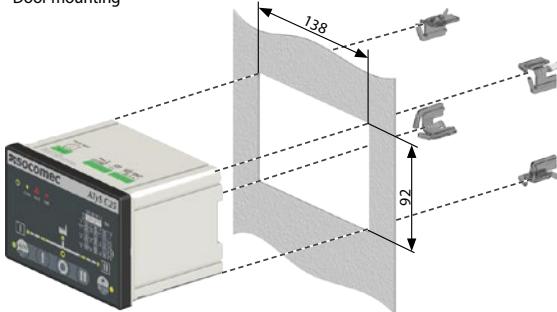

ATSC25

## Technical data

### Mounting

#### Door mounting

Door cut-out of 93(+0.8) x 138(+1) mm, door thickness 1.5-3mm.

Remove all connectors and clip before inserting the controller in the cut-out then fix the controller in place using all 4 fixations clips

#### DIN rail mounting

##### 1. Mounting

IEC 60715 DIN rail

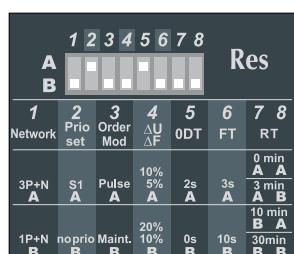

When mounting make sure both clips are pushed up, then clip on the DIN Rail.

##### 2. Unmounting

To remove from the DIN Rail, drag the two mounting clips down before removing the product.

### Settings

After changing DIP switch settings press RES button shortly (<3s) to validate.

To reset settings configured through communication long press on RES button > 10s.

| DIP Switch             |    |  |
|------------------------|----|--|
| DIP 1<br>A/B           | A  | Three phase network  |
|                        | B  | Single phase network   |
| DIP 2<br>A/B           | A  | Priority source 1  |
|                        | B  | No priority  |
| DIP3<br>A/B            | A  | Control mode impulse logic   |
|                        | B  | Control mode contactor logic   |
| DIP 4<br>A/B           | A  | Overvoltage setting at 10% of nom voltage / overfrequency setting 5% of nominal frequency (hysteresis value is 20% of $\Delta U/\Delta F$ )  |
|                        | B  | Overvoltage setting at 20% of nom voltage / overfrequency setting 10% of nominal frequency (hysteresis value is 20% of $\Delta U/\Delta F$ ) |
| DIP5<br>A/B            | A  | Load supply down time of 2 second (ODT = 02 sec)   |
|                        | B  | Load supply down time of 0 second (ODT = 0 sec)  |
| DIP6<br>A/B            | A  | Wait time of 3s before source is lost ( Fail timer = 3s)   |
|                        | B  | Wait time of 10s before source is lost ( Fail timer = 10s)   |
|                        | AA | Wait time of 0min before source returns ( retrun timer = 0min)   |
|                        | AB | Wait time of 3min before source returns ( retrun timer = 3min)   |
|                        | BA | Wait time of 10min before source returns ( retrun timer = 10min)   |
| DIP 7 & 8<br>A/B & A/B | BB | Wait time of 30min before source is lost returns ( retrun timer = 30min)   |
